

Explore the endless possibilities of Roland Cloud—the drum sounds of the world are yours!

Roland Cloud offers an ongoing stream of premium sound contents, including contents such as renowned drum kit sounds like the Drum Workshop, Inc. (DW), our V-Drums flagship model sounds from the past, sounds that were created in collaboration with other artists and more.

You can install up to 100 different content titles in the “rack”, the storage area on the V51 drum sound module. Use a smartphone app to download these contents from the cloud via Wi-Fi to the V51. This lets you build your own unique drum kit that’s found nowhere else in the world, with just the sounds you’ve always wanted.

Overview

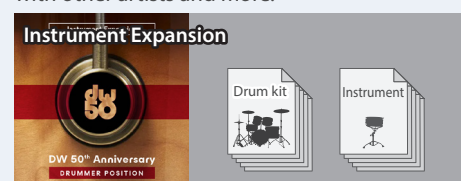

Drum kits and instruments

On the V51, the sounds that play when you strike each pad are called “instruments”. A set of sounds (instruments) allocated to the respective pads is called a “drum kit”.

Instrument Expansions

An Instrument Expansion is a package containing multiple drum kits, along with advanced modeled sounds called “instruments” that include sample waveforms.

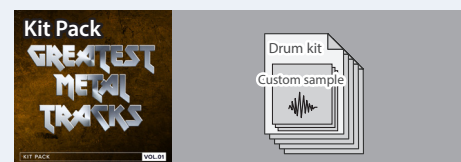

On Roland Cloud, you can find Instrument Expansions such as renowned drum kit sounds like the DW, our V-Drums flagship model sounds from the past, sounds that were created in collaboration with other artists and more.

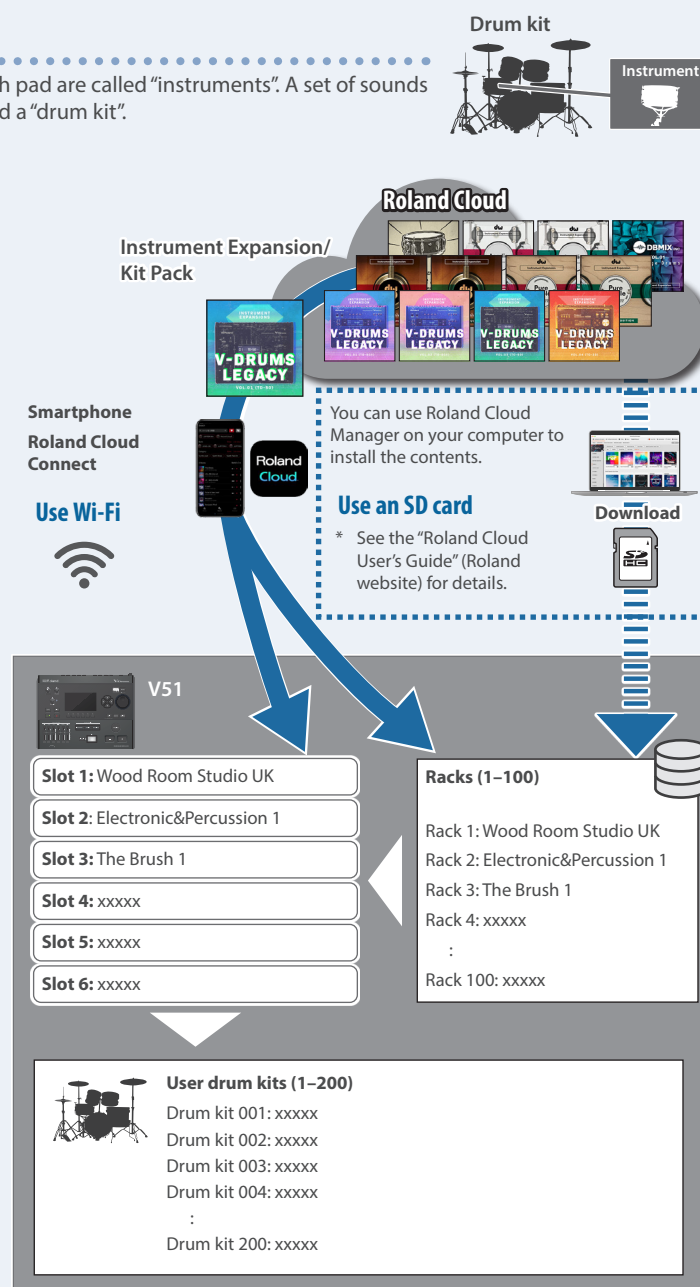

Kit Packs

Kit Packs are drum kit packages completed by pro drummers using custom samples that were created by audio engineers.

Roland Cloud offers drum kits and other Kit Packs that recreate the sound of kits used in classic songs, such as rock and pop.

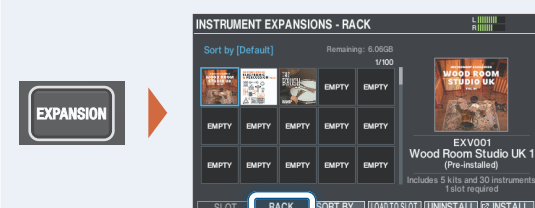

Use the Roland Cloud Connect smartphone app to install the Instrument Expansions and Kit Packs (hereafter “contents”) available via Roland Cloud into the rack of the V51, and then load these into slots.

Racks (1–100)

A “rack” is a storage area that lets you install up to 100 contents.

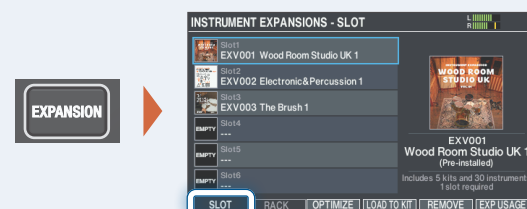

MEMO

The racks and slots 1–3 contain Instrument Expansions when this unit is shipped from the factory.

Slots (1–6)

You can play the contents that you’ve installed in a rack by loading them into a slot.

The expansions for the “rack” can be loaded into the “slots” from Roland Cloud Connect or by operating the V51.

User drum kits (001–200)

By loading the kits in the contents that are already in slots 1–6 into user drum kits 001–200, you can quickly call up and play the kits with the [KIT] button or by selecting from the kit list.

* You can overwrite the factory preset kits to save your own kit data. If you want to recall the factory preset kits, you can reload the kits all at once, or kit by kit. For details, refer to “Restoring the drum kit to factory settings” in “Quick Start”.

1 Registering for Roland Cloud membership

You must register for a Roland Cloud membership if you want to use the contents provided on Roland Cloud.

By registering this product, you can use the paid contents for a certain period of time, free of charge. Make sure to register this product as shown below.

1. Register your product using the orange card.

* The orange card is inside the bag of the drum kit (or V51 sound module) setup guide.

If you don’t have a Roland account, make a new one.

2. Once you have registered your product, you will receive an e-mail with a coupon code.

- * If you don’t receive an e-mail, check the following.
 - Check whether the e-mail has been filtered out from your inbox.
 - Search your e-mail inbox for “no-reply@roland.com”.
 - Make sure that HTML e-mails can be received.

3. Follow the steps in the e-mail to enter your coupon code.

Once you enter the coupon code, you can use the paid contents free of charge for a certain period of time.

Important

If you already have an account you’re using for the V51, make sure to log in with that account.

The contents that you download from Roland Cloud are linked to your user license. For this reason, if you perform the following steps with a different account without executing the “Remove License” command on the V51, you can’t use the new contents.

Use caution if you have contents that are already installed.

* For details on the “Remove License” command, refer to the “Reference Manual” (Roland website).

* You will be charged after your free membership period expires. If you wish to cancel your paid membership plan, visit the following website to access [Cancel Subscription].

<https://www.roland.com/cloud/account-detail>

2 Installing Roland Cloud Connect

1. Use your smartphone to access the website shown below.

<https://roland.cm/v51rccapp>

2. Follow the onscreen instructions to install the app for iOS or Android.

3 Setting up Roland Cloud Connect

Log in to Roland Cloud Connect and configure Wi-Fi on the V51.

1. Turn on the power of the V51.

2. Tap the icon for the “Roland Cloud Connect” app on your smartphone to launch it.

- * Activate Wi-Fi and **Bluetooth®** on your smartphone.
- * When the app launches, enable the **Bluetooth®** function and location data when prompted to do so.

3. Read the “Terms of Use”, and tap “Agree” if you agree.

4. Input the e-mail address and password you registered for your Roland account, and tap “Log in”.

* Once you log in to Roland Cloud Connect, you can view the “Roland Cloud Connect Owner’s Manual” from “☺” → “Show online manual”.

5. The device setup screen appears the first time the app launches. You can also tap the [Connect] button at the bottom right of the app, and then tap the [Device Setup] button.

6. Select “V51” from the list of devices.

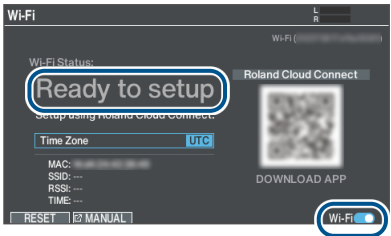

7. Following the onscreen instructions in the app, press the [SETUP] button on the V51, select “Wi-Fi” and then press the [ENTER] button.

MEMO

If more than one V51 appears on the app screen, select the V51 (V51 **) you want to connect to.

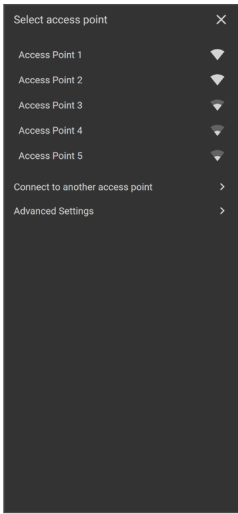

8. Make sure that the [F6] (Wi-Fi) button is on, and wait until “Ready to setup” appears onscreen.

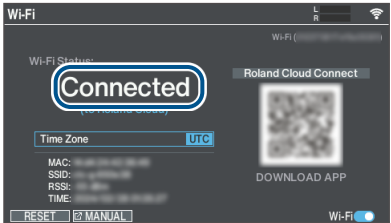

MEMO

To reset the Wi-Fi access point on a V51 for which Wi-Fi has already been set up, press the [F1] (RESET) button and wait until “OK” appears in the display.

9. Once the “Select Access Point” screen appears on the app, select the Wi-Fi access point used for connecting the V51 to Roland Cloud. Follow the onscreen instructions to input the access point password.

Wait until “Connected” is shown on the V51 screen.

Now you’re finished. You can now access Roland Cloud from the V51 via Wi-Fi.

Next, download some contents.

MEMO

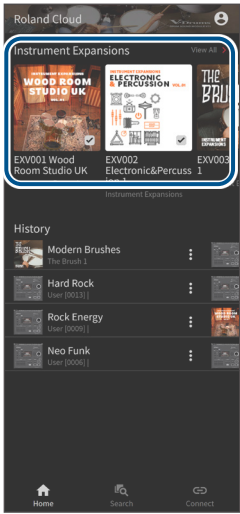

Once the unit is connected via Wi-Fi, the time is shown on screens such as the KIT screen. The time data is also recorded along with any backup data that’s saved to the SD card.

The time zone is set to “UTC” by default.

To correctly display and record the time, use the dial on the Wi-Fi screen to set the time zone according to the region where you’re residing.

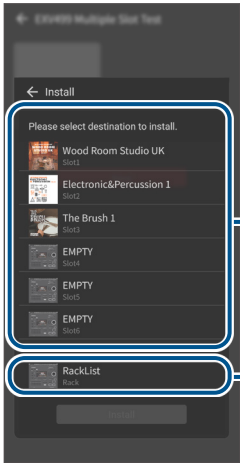

4 Installing contents from Roland Cloud

1. Tap the [] (home) button in the Roland Cloud Connect app and select the content you want to install on the V51.

2. Tap “Next”.

3. Select a slot (1–6) or the rack where you want to load the data, and tap “Install”.

Specify the slot (1–6) where you want to load the data.
The content is loaded into the specified slot and installed into the rack.

This specifies the rack as the load destination.
The Contents is installed only into the rack.

4. Once the confirmation message appears, tap “OK”.

MEMO

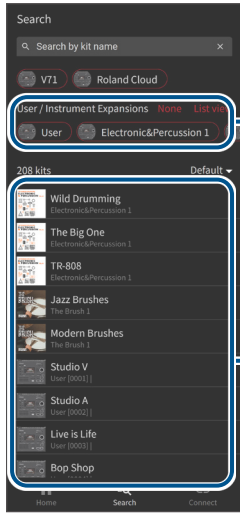

The contents are installed from before the empty rack (1–100) in order.

5 Loading and playing content drum kits

You can load and play the drum kits into the V51, meaning the contents loaded into the slots.

Load the kits you like into the V51 user drum kits.

1. Tap the [] (search) button in the “Roland Cloud Connect” app.

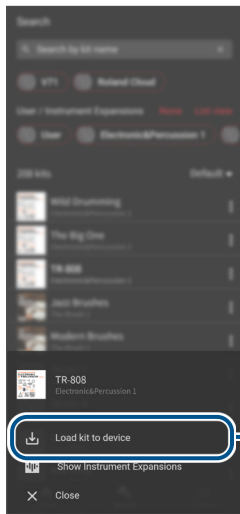

You can select a user drum kit or contents from the list.
When loading contents, it’s easier to select kits by deselecting the user drum kits.

Select the kit that you want to load.

2. Tap to select the kit from the content you want to load.

The kit is loaded into the temporary area of the V51, and you can play the selected kit on the V51.

3. To load the data into a user drum kit, tap the “  ” mark to the right of the kit name and then tap “Load kit to device”.

Tap “Load kit to device” to load the data into a user drum kit.

4. Once you’ve selected the user drum kit where you wish to load the data, tap “Load”.

5. Once the confirmation message appears, tap “OK” to load the kit.

Authenticating your membership

You can keep using the contents you imported via Roland Cloud Connect by periodically authenticating your membership.

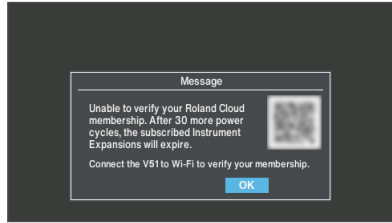

Your membership is automatically authenticated when you connect the V51 to Wi-Fi.

This requires you to periodically connect the V51 to a Wi-Fi network.

* The “  ” icon is shown at the top right-hand corner of the KIT screen when Wi-Fi is connected.

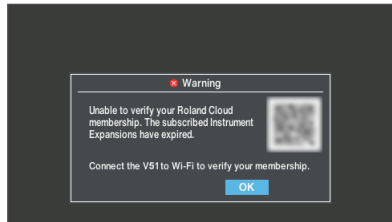

Once you’ve turned the power on and off 20 consecutive times without authenticating your membership, the following message appears when you next turn on the power.

Connect this unit to Wi-Fi to authenticate your membership.

After you’ve turned the power on and off 50 consecutive times without authenticating your membership, the following message appears, and the contents you’ve imported are disabled.

Connect this unit to Wi-Fi to authenticate your membership. The contents you’ve imported are re-enabled once your membership is authenticated.

The contents you have imported via Roland Cloud Connect are disabled under the following conditions if you have not authenticated your membership.

When you have used the contents for 50 consecutive power cycles without authenticating

Connect this unit to Wi-Fi to authenticate your membership.

When your membership contract has expired

You can still keep using contents offered for free even after your membership expires.

Purchasing a Lifetime Key for the contents (one-time purchase) to use contents without Wi-Fi membership authentication

To purchase a Lifetime Key, use Roland Cloud Manager on your computer (Windows/Mac). You can keep using the contents for which you’ve purchased a Lifetime Key even after your membership expires.

For details on Roland Cloud Manager and Lifetime Keys, see the “Roland Cloud User’s Guide” (Roland website) in the Support section of the V51 product page.

* This document explains the specifications of the product at the time that the document was issued. For the latest information, refer to the Roland website.
